

Here's a recap of our October 17, 2019 Program.

Simone met us in her lovely garden with a few of her handmade bird baths. She shared how she worked, rolled, designed, carved, glazed and fired each handmade clay tile artwork. For two years she designed and worked with two friends to create the charming Livermore Wine Trail wall in old downtown Livermore. She snuck in a few special details she shared with us.

Next we learned her fav tips, supplies and techniques for plain air oil painting. Once inside her light filled studio we saw her recent work from Mendocino and Yosemite, her framed oil portraits, her sculptures and her recent pieces of fused glass jewelry.

Simone is a very passionate and giving artist and we enjoyed our time with her. Afterward, we all decided to lunch at a nearby Thai restaurant—it was fun and the food was delicious.
